

FAIZAN AHMED

House no 499 Street 12 Munavar colony, Rawalpindi, Pakistan | +923342111283 | muhammadfaizanahmed62@gmail.com

Professional Summary

Motivated Flutter Front-End Developer with hands-on experience designing modern mobile UIs, implementing animations, and building responsive layouts. Strong at converting design concepts into functional Flutter screens using reusable components, GetX for UI updates, and clean architecture principles. Eager to work in a professional team to sharpen front-end skills and deliver high-quality user experiences.

Work History

Freelancing - Flutter Developer | Online Platforms (Upwork, Fiverr, Direct Clients) | 2020 - 2025

- Developed and delivered visually appealing cross-platform mobile UI screens using Flutter for clients across different industries.
- Transformed Figma designs, wireframes, and screenshots into pixel-perfect, responsive Flutter interfaces.
- Built reusable UI components such as custom buttons, text fields, cards, and onboarding screens.
- Implemented smooth animations, transitions, and modern UI effects to enhance user experience.
- Optimized screen rendering and improved UI performance by using clean widget structures and efficient state updates (GetX).

Flutter Front-End Developer | Grace Technology | 2022 - 2024

- Designed and developed advanced, visually rich front-end interfaces for cross-platform Flutter applications.
- Implemented pixel-perfect, responsive UIs using Flutter widgets, animations, and custom layouts for a seamless user experience.
- Collaborated closely with back-end teams to integrate RESTful APIs and dynamic data-driven views.
- Optimized app rendering and enhanced performance by using efficient state management (Provider, Riverpod, or Bloc).
- Converted complex Figma/Adobe XD designs into fully functional Flutter screens while maintaining design accuracy.

Skills

- Flutter Development (Cross-Platform Mobile Apps).
- Dart Programming Language.
- State Management (GetX).
- REST API Integration (JSON, HTTP, Firebase).
- SQLite & Local Storage.
- UI/UX Implementation (Material Design, Responsive Layouts).
- Third-Party Libraries & Plugins.
- Version Control (Git/GitHub).
- App Deployment (Google Play Store).
- Error Handling & Debugging.
- Clean Code & Documentation.
- Strong Oop Concepts.

Education

Bachelor's : in Computer Science **University of Engineering & Technology**
Taxila - Taxila, Pakistan

Sep 2022
